WHAT CAN IT DO ?

The fastest most effective method of disinfecting surfaces to kill bacteria and viruses. The electrostatic technology causes the disinfecting mist to stick to all sides of surfaces without the need to spray directly making it extremely efficient at bacterial and viral control.

Coats between 2,800 to 23,000 square feet on a single tank of fluid. Combined with its patented electrostatic charge, this allows you to apply an even coating on all surfaces making it the most effective method of disinfection available.

BENEFITS

- **Simple to operate without specialist training**
- **4 Hour Use on one charge sufficient to treat 100 rooms of 10x10**
- **Turn around of areas is drastically reduced with the disinfection being far more reliable than traditional hand methods.**
- **Cordless convenience - ready to go 24 hours a day.**

CORDLESS HANDHELD

Our Professional Cordless Electrostatic Sprayer allows the user hours of spraying time without the hassle of dragging a cord. In addition, it is designed to save time and labour, spray less liquid, and cover more surfaces. This patented technology provides an electrical charge to solutions, allowing them to wrap conductive surfaces with an effective and even coverage. Double-charged particles envelope all conductive surfaces – shadowed, vertical and underneath.

- Lithium-Ion battery allows you to run between 20 - 30 tanks on a single charge.
- Weighs only 5kg with a full tank.
- Cordless
- 3-in-1 nozzle lets you set the spray particle size to match your application

Just ask for a rental quote.

We hold stock of spare machines so can replace faulty or damaged equipment 24 hours.

For units undertaking heavy usage we offer regular replacements to ensure you are not left without cover.

CORDLESS BACKPACK

Our Professional Cordless Electrostatic Backpack Sprayer is designed to allow the professional to cover up to 23,000 square feet on a single tank of fluid (coverage per tank is determined by internal testing using flow rate and particle size). In addition, it is designed to save time and labour, spray less liquid, and cover more surfaces. This unique patented technology provides an electrical charge to solutions, allowing them to wrap conductive surfaces with an effective and even coverage. Double-charged particles envelope all conductive surfaces – shadowed, vertical and underneath.

- Removable Easi-Fill HDPE tank
- Treat up to 20,000ft²+ on 1 tank.
- Cordless
- 3-in-1 nozzle lets you set the spray particle size to match your application
